2. END-TO-END ACCOUNTING WORKFLOW

01

Gateway Access

Login as colleen

02

Metric Audit

Review 4 Summary Cards

03

Timesheet Check

Audit Hours & Mileage

04

Receipt Lightbox

Verify Expense Proof

05

Pulse AI Audit

Scan Database Flags

06

Export Ledgers

QuickBooks CSV & Excel

3. FINANCIAL METRICS CALCULATION FORMULAS

Metric Card	Data Source	Calculation Rule	Accountant Action
Total Billable Hours	QRE Time Logs	Sum of all verified shift hours	Check against plant roster
Mileage Tracker	Travel Logs	Total Distance (km) x Rate (\$/km)	Verify starting/ending plant
Pending Expenses	Expense Claims	Fuel + Tolls + Parking + Meals	Click photo lightbox to verify receipt
Grand Payroll / Invoice	Combined Total	(Hours x Rate) + Mileage + Expenses	Reconcile before exporting to QB

4. STEP-BY-STEP ACCOUNTING PROCEDURES

STEP 1: LOGIN & LIGHT MODE SELECTION

- Open <https://proud-lavoisier.vercel.app> on your browser.
- Enter Username: "colleen" and Password: "Colleen2026!" and click Authenticate.
- Notice that the interface automatically defaults to Light Mode for optimal tabular contrast.
- You can switch between Day (Dark) and Night (Light) mode anytime via the top header toggle.

STEP 2: TIMESHEETS & HOURS AUDITING

- Navigate to the "Timesheets & Billing" tab on the top menu bar.
- Filter hours by Supplier (e.g. Auto Kabel, Magna, Hutchinson) or Plant (GM Oshawa, Ford).
- Audit regular vs overtime rate multipliers for weekend or night shifts.
- Use the "Manager Bulk Entry Portal" if you need to log or backdate hours for an entire team.

STEP 3: VERIFYING RECEIPT LIGHTBOXES

- Scroll down to the "Expense Verification Board".
- Identify claims under Fuel, Tolls, Parking, or Meals.
- Click on the receipt thumbnail photo to expand the High-Resolution Lightbox Viewer.
- Cross-check the paper receipt total against the submitted amount and click Approve '.

STEP 4: RUNNING PULSE AI FINANCIAL AUDIT

- Click the floating "Pulse AI Copilot" icon in the bottom right corner.
- Click "Run Financial Audit" to trigger automatic database scanning.
- Pulse AI will flag shifts >16 hours, negative value logs, or claims missing photo receipts.
- Resolve all flagged warnings before finalizing exports.

STEP 5: FINANCIAL DATA EXPORTS

- QuickBooks CSV (.csv): Click "Export QuickBooks CSV" for direct import into corporate QB.
- Styled Excel Ledger (.xlsx): Click "Export Excel Ledger" to download styled accounting tables.
- PDF Client Statement (.pdf): Click "Export PDF Report" for white-labeled client invoicing.

5. REAL-WORLD COMPREHENSIVE SYSTEM TEST SCENARIO

TEST SCENARIO: GM Oshawa Plant Rework Audit (Auto Kabel Supplier)

This scenario tests the COMPLETE pipeline: Mobile Rep logging -> Live Database sync -> Accountant Audit -> Lightbox verification -> Pulse AI check -> Release & Send

PHASE 1: FIELD REPRESENTATIVE (CLARENCE) ACTION

1. Open <https://proud-lavoisier.vercel.app> and log in as "clarence" / "Clarence2026!".
2. Click "New Suspect Material": Pin CAD defect dot on component diagram, select Part #86286761 (Auto Kabel), upload photo proof, and click "Release & Send".
3. Click "Log Rework Hours": Select GM Oshawa Plant, enter 8.5 Hours, 250 Total Pcs, 240 OK, 10 NOK reworked, and log 45 km Travel Distance.
4. Click "Log Expenses": Select Category "Tolls", enter Amount "\$32.50", attach toll receipt photo, and submit.

PHASE 2: ACCOUNTANT (COLLEEN) SYSTEM AUDIT & VERIFICATION

1. Open a new window, log in as "colleen" / "Colleen2026!".
2. Verify Dashboard Metric Cards: Confirm Total Billable Hours updated (+8.5 hrs) and Mileage (+45 km).
3. Audit Timesheets: Go to "Timesheets & Billing" tab, verify Clarence's 8.5 hrs logged under Auto Kabel for GM Oshawa Plant.
4. Verify Receipt Lightbox: Scroll to Expense Verification, click the \$32.50 Toll receipt image thumbnail, view photo in high-res Lightbox, and click 'Approve'.
5. Run Pulse AI Auditor: Click Pulse AI floating widget -> Click "Run Financial Audit" -> Confirm zero unverified expense warnings remain.
6. Export Financial Ledgers: Click "Export QuickBooks CSV" and "Export Excel Ledger" to verify files generated cleanly.

SYSTEM VERIFICATION SUCCESS CRITERIA

If all 6 Phase 2 verification steps pass without errors, the entire IDS Pulse Operations Suite is 100% operational and ready for production deployment!
