ASSIGN FIELD INSPECTOR * Clarence Kuiken	PLANT LOCATION Magna Belleville Plant 4
DESCRIPTION / SCOPE Ford F-150 Harness Micro-Switch Inspection	BILLING / PAY RATES \$85.00/hr Billing \$45.00/hr Inspector Pay

🚀 STEP-BY-STEP TESTING WORKFLOW

STEP 1: CLIENT ONBOARDING & PO BUDGET ALLOCATION

ACTOR: Donna Cabral (Operations Lead)

💡 **Business Rationale:** Before field inspectors can clock in or record defect sorting on a plant floor, the Operations Supervisor **MUST** onboard the client company, map the plant location, allocate a PO budget hours cap, and assign a qualified inspector. Without setting the budget cap first, field operations cannot track billing limits or prevent client budget overruns.

- Sign in as **Donna Cabral** (username: donna / password: password123).
- On the left sidebar menu under **SETTINGS & ADMIN**, click **Projects Registry**.
- At the top right of the telemetry panel, click the cyan + **Onboard Project & PO** button.
- Fill in the **Magna International** dataset values above into the onboarding modal. Assign Field Rep: **Clarence Kuiken**.
- Click the bottom button **Register Project Assignment**.

✅ **Expected Verification Result:** Toast notification "Successfully onboarded Magna International and registered project assignment!" appears. Magna International shows on board with 100 Hours Budget Cap.

STEP 2: FIELD INSPECTOR WALKTHROUGH & DEFECT LOGGING

ACTOR: Clarence Kuiken (Quality Inspector)

Business Rationale: Quality Inspectors stationed at supplier manufacturing plants audit incoming component lots, sort defective parts, and log daily shift hours. Logging part numbers inspected and defect counts in real time gives client management immediate visibility into quality containment.

1. Sign in as **Clarence Kuiken** (username: clarence / password: password123 or click 1-click shortcut).
2. Select Project: Magna Belleville Plant 4 - Ford F-150 Harness Micro-Switch Inspection.
3. Enter Shift Details: Regular Hours Worked: **8.0**, Parts Inspected: **350 Pcs**, Defects Found: **12 Pcs**.
4. Shift Walkthrough Summary: "Completed 100% micro-switch pin continuity check on F-150 harnesses. 12 harnesses flagged for loose connector clips."
5. Click **Submit Daily Shift Report**.

✓ Expected Verification Result: Shift report is recorded with status "Sent / Pending Review". Shift telemetry updates live.

STEP 3: SUPERVISOR SHIFT REVIEW & APPROVAL

ACTOR: Donna Cabral / Greg Phillippe (Operations Supervisor)

Business Rationale: Supervisors must audit field inspectors' shift logs to confirm that logged hours match actual plant attendance and that defect counts are verified. Approving shift reports locks the shift record and deducts hours from the client's PO budget cap.

1. Sign in as **Donna Cabral** or **Greg Phillippe**.
2. On the left sidebar menu under **QUALITY & OPERATIONS**, click **Shift Summaries Log**.
3. Locate Clarence Kuiken's shift entry for Magna Belleville Plant 4.
4. Review details (8.0 hrs, 350 Pcs Inspected, 12 Defects) and click **Approve Shift**.

✓ Expected Verification Result: Shift status updates to "Published / Approved". Magna PO budget updates from 100.0 hrs to 92.0 hrs remaining.

STEP 4: FINANCIAL ACCOUNTING & CLIENT INVOICE PDF EXPORT

ACTOR: Colleen Boyd (Financial Controller)

Business Rationale: Once shift reports are approved, the Financial Accountant consolidates billable hours and calculates client invoices and inspector payroll. Generating an official branded PDF invoice ensures the client receives a zero-error, itemized bill for quality containment services.

1. Sign in as **Colleen Boyd** (username: colleen / password: password123).
2. On the left sidebar menu under **FINANCIAL & AUDIT**, click **Timesheets & Logging**.
3. Select **Magna International** from the Client Filter dropdown.
4. Verify calculations: 8.0 hrs @ \$85.00/hr = **\$680.00 CAD Billing** | 8.0 hrs @ \$45.00/hr = **\$360.00 CAD Inspector Pay**.
5. Click the green button  **Export Official Client Invoice PDF**.

✓ Expected Verification Result: Browser downloads branded invoice PDF "Invoice_Magna_International.pdf" with itemized shift lines, tax calculation, and zero text overlap.
